

TISSIUM

Three Internship positions in the Development Team

Contract: Internship (Convention de Stage), 6 months, starting from August 2020 (Flexible)

TISSIUM is a fast-paced medical device company, dedicated to the development of innovative tissue reconstruction solutions. We are leveraging our technology platforms to develop novel solutions to disrupt the field of surgery and positively impact the life of patients.

We are actively looking to incorporate Interns to be part of the Development department at TISSIUM. These persons will be responsible to manage key microprojects and studies incorporated within the development and verification/validation of TISSIUM's products.

Duties & Responsibilities

- ✓ Plan and follow various development activities including but not limited to:
 - Mechanical characterization;
 - Chemical characterization;
 - Biocompatibility studies;
 - Stability studies and performance testing;
 - In vitro degradation studies.
- ✓ Plan and follow subcontracted activities.
- ✓ Contribute to the documentation required for developing medical device products.
- ✓ Follow safety practices and procedures.

Job Environment/Interactions

- ✓ Work closely with TISSIUM's other departments to understand the product development process.
- ✓ Present results in team meetings.

Qualifications & Skills

- ✓ M2 or last year Engineering school
- ✓ Experienced with study conduction, data management and presentation
- ✓ Experience with cell culture is a plus
- ✓ Good communication skills in English (written and verbal)

Other Skills

- ✓ Curious and creative in approaching technical challenges
- ✓ Organized, rigorous and team player
- ✓ Passionate about improving patient's life

The interns will report to the department head. The position is based at Tissium in Paris, France. To apply to this position please email your CV to jobs@tissium.com. Ref: 202005-002
